CSC309 Spring 2017 Project

Team: Shaun Memon, Julie Wang, Regan Ding, Shuo Feng

Project Description:

A secure sales system tailored to university campuses where students can post information on things that they want to sell. This app would be tailored to students on campus giving them an easy way to connect with their peers, the ones who are most likely to be interested in what they're offering. The system provides a safe way for people to get in contact for price negotiations, organising pick up locations, and discussing other details. Categories will be tailored to be relevant to what students are most likely trying to sell such as textbooks, clickers for classes, speciality course materials, clothes, accessories, furniture, show tickets etc..
